1 Introduction

1.1 The Sustainable Farming Incentive (SFI) pays farmers for practical actions that support food production, improve the environment, and build business resilience. They also help protect the long-term health of soils, water, and wildlife, which are essential for sustainable food production and a healthy environment.

1.2 This dataset contains both point and polygon data layers describing the extent and location of all land under management in the SFI Schemes and the management in place upon them.

1.3 The published data includes information on the Sustainable Farming Incentive agreements that are currently active.

1.4 Data showing management actions in place has been provided for all current undertakings within active agreements. This document includes a reference list of action codes and action titles which appear in all variations of the SFI dataset, different scheme years have different action offerings available reflecting the continued improvement of the scheme. Further information about current SFI scheme variations can be found on the Government web pages.

1.5 The data layers have been produced by linking information extracted from the relevant scheme administration system against a national extract of the Land Parcel information system held by the Rural Payments Agency (RPA), derived from Ordnance Survey data. It is released under the [Open Government Licence for public sector information](#).

1.6 These datasets are correct as of the first day of the month, with the data being updated monthly by RPA's Geospatial Team to ensure that any changes are reflected as early as possible. Any changes made after the first day of the month will be reflected in the following months data.

2 Overview

The data produced by the RPA Geospatial team is comprised of SFI Agreement Boundaries and Management Action Centroid points, covering all live agreements in Sustainable Farming Incentive Schemes.

Agreement Data

These spatial agreement datasets define the geographic extent and location of all land under management within the Sustainable Farming Incentive Agri-Environment Scheme. A single business (SBI level) can have multiple agreements in the SFI scheme and any amendments to SFI agreements will be made under the same agreement ID, care is therefore required when linking data to previous/existing report outputs.

The data has been produced by linking tabular information extracts on scheme uptake, from the scheme administration system, against a national extract of the Land Parcel Information System held by the Rural Payments Agency both extracted in conjunction to ensure consistency of data.

Actions Data

These spatial management action datasets define the approximate location of management actions undertaken within the respective Agri-Environment Scheme agreements. The centre point (centroid) of the parcel is used to show which actions are underway within a given parcel. For management actions that are undertaken at agreement level, i.e. right across the agreement, a single point within the boundary (not necessarily location specific) is used upon which the agreement level management is displayed. It is not possible to define the exact location of the management options due to system limitations.

A single business can/will have multiple individual management actions both in the same parcel and across the contract. Each row in the data sets out the information for a single action, and it must therefore be noted that several action points can be assigned to a single parcel or contract effectively stacking the data. As in the agreement data, care is required when linking data to previous/existing report outputs.

The data has been produced by analysing tabular information extracts on scheme uptake, to convert the associated land parcel references to a spatially enabled centroid point. In the case of agreement level actions, the centroid point is calculated from the agreement boundary data where it is guaranteed to fall within the contract.

3 Attributes

Included below is a quick breakdown of the data column headers.

Note: - The data supply detailed below covers the full supply of data, as aligned to the publicly available versions of RPA scheme data. The supply you receive may have certain sensitive fields removed subject to any data sharing agreement with the Rural Payments Agency.

Sustainable Farming Incentive Scheme Actions:

app_id	<i>Unique Application ID</i>
ref_year	<i>Application year</i>
contract_start	<i>Start date of agreement</i>
contract_end	<i>End date of agreement</i>
scheme	<i>SFI Scheme Strand (SFI_23, SFI_EO etc.)</i>
application_type	<i>Scheme strand</i>
option_code	<i>Option code</i>
area	<i>Total area of the option</i>
mtl	<i>Total length of the option</i>
units	<i>Number of units of the option</i>
uom_desc	<i>Unit of measure for the option</i>
opt_year	<i>Indicates the location of the option within the agreement area in the year specified</i>

Sustainable Farming Incentive Scheme Agreements:

app_id	<i>Unique Application ID</i>
ref_year	<i>Application year</i>
contract_start	<i>Start date of agreement</i>
contract_end	<i>End date of agreement</i>
scheme	<i>SFI Scheme Strand (SFI_23, SFI_EO etc.)</i>
application_type	<i>Scheme strand</i>
grossar	<i>Total area of the agreement</i>

4 Actions List

Option Code	Option Description
AB1	<i>Nectar Flower Mix</i>
AB2	<i>Basic Overwinter stubble</i>
AB3	<i>Beetle banks</i>
AB4	<i>Skylark Plots</i>
AB5	<i>Nesting Plots for Lapwing</i>
AB6	<i>Enhanced overwinter stubble</i>
AB7	<i>Wholecrop cereals</i>
AB8	<i>Flower rich margins and plots</i>
AB9	<i>Winter bird food</i>
AB10	<i>Unharvested cereal headland</i>
AB11	<i>Cultivated areas for arable plants</i>
AB12	<i>Supplementary winter feeding for farmland birds</i>
AB13	<i>Brassica fodder crop</i>
AB14	<i>Harvested low input cereal</i>
AB15	<i>Two year sown legume fallow</i>
AB16	<i>Autumn Sown BumbleBird Mix</i>
AC1	<i>Access Capital Items</i>
AC2	<i>Countryside Educational Visits Accreditation Scheme (CEVAS)</i>
AF1	<i>Plant an agro-forestry woodland tree</i>
AF2	<i>Plant an agro-forestry fruit tree</i>
AF3	<i>Supplement: Species Diversity Bonus</i>
AGF1	<i>Maintain very low density in-field agroforestry on less sensitive land</i>
AGF2	<i>Maintain low density (20-50 trees per ha) in field agroforestry</i>
AGF2	<i>Maintain low density in-field agroforestry on less sensitive land</i>
AHL1	<i>Pollen and nectar flower mix</i>
AHL2	<i>Winter bird food on arable and horticultural land</i>
AHL3	<i>Grassy field corners or blocks</i>
AHL4	<i>4m to 12m grass buffer strip on arable and horticultural land</i>
AHW1	<i>Bumblebird mix</i>
AHW2	<i>Supplementary winter bird food</i>
AHW3	<i>Beetle banks</i>
AHW4	<i>Skylark plots</i>
AHW5	<i>Nesting plots for lapwing</i>
AHW6	<i>Basic overwinter stubble</i>
AHW7	<i>Enhanced overwinter stubble</i>
AHW8	<i>Harvest whole crop spring cereals and maintain overwinter stubble</i>
AHW9	<i>Unharvested cereal headland</i>
AHW10	<i>Low input harvested cereal crop</i>
AHW11	<i>Cultivated areas for arable plants</i>
AHW12	<i>Manage woodland edges on arable land</i>
AL1A	<i>Arable and Horticultural Land</i>
AL1B	<i>Additional Payment</i>
AL2A	<i>Arable and Horticultural Land</i>

AL2B	<i>Additional Payment</i>
AL3A	<i>Arable and Horticultural Land</i>
AL3B	<i>Additional Payment</i>
APO	<i>Additional Parcel Option</i>
AQ1	<i>Automatic slurry scraper</i>
AQ2	<i>Low ammonia emission flooring for livestock buildings</i>
BC4	<i>Tree guard (wood post and wire)</i>
BE1	<i>Protection of in-field trees on arable land</i>
BE2	<i>Protection of in-field trees on intensive grassland</i>
BE3	<i>Management of hedgerows</i>
BE4	<i>Management of traditional orchards</i>
BE5	<i>Creation of traditional orchards</i>
BE6	<i>Veteran Tree Surgery</i>
BE7	<i>Supplement for restorative pruning of fruit trees</i>
BFS1	<i>12m to 24m watercourse buffer strip on cultivated land</i>
BFS2	<i>Buffer in-field ponds on arable land</i>
BFS3	<i>Buffer in-field ponds and ditches on improved grassland</i>
BFS3	<i>Buffer in-field ponds on improved grassland</i>
BFS4	<i>Protect in-field trees on arable land</i>
BFS5	<i>Protect in-field trees on intensive grassland</i>
BFS6	<i>Habitat strip next to watercourses</i>
BN1	<i>Stone-faced bank repair</i>
BN2	<i>Stone faced bank restoration</i>
BN3	<i>Earth bank creation</i>
BN4	<i>Earth Bank Restoration</i>
BN4	<i>Earth Bank Restoration</i>
BN5	<i>Hedgerow laying</i>
BN6	<i>Hedgerow Coppicing</i>
BN7	<i>Hedgerow Gapping</i>
BN8	<i>Hedgerow Supplement - Casting Up</i>
BN9	<i>Hedgerow Supplement - substantial Pre-Work</i>
BN10	<i>Hedgerow Supplement - Top Binding and Staking</i>
BN11	<i>Planting new hedges</i>
BN12	<i>Stone Wall Restoration</i>
BN13	<i>Stone Wall - Top Wiring</i>
BN13	<i>Stone wall supplement - Top wiring</i>
BN14	<i>Stone wall supplement - Stone from quarry</i>
BN15	<i>Stone wall supplement - difficult sites</i>
BND1	<i>Maintain dry stone walls</i>
BND2	<i>Maintain earth banks or stone-faced hedgebanks</i>
CAHL1	<i>Pollen and nectar flower mix</i>
CAHL2	<i>Winter bird food on arable and horticultural land</i>
CAHL3	<i>Grassy field corners and blocks</i>
CAHL4	<i>4m to 12m grass buffer strip on arable and horticultural land</i>
CGS16	<i>Supplement: Rush control</i>

CHRW1	<i>Assess and record hedgerow condition</i>
CHRW2	<i>Manage hedgerows</i>
CHRW3	<i>Maintain or establish hedgerow trees</i>
CIGL1	<i>Take improved grassland field corners or blocks out of management</i>
CIGL2	<i>Winter bird food on improved grassland</i>
CIGL3	<i>4m to 12m grass buffer strip on improved grassland</i>
CIPM1	<i>Assess integrated pest management and produce a plan</i>
CIPM2	<i>Flower-rich grass margins, blocks, or in-field strips</i>
CIPM2	<i>Flower-rich grass margins, blocks, or in-field strips (on arable land or permanent crops)</i>
CIPM3	<i>Companion crop on arable and horticultural land</i>
CIPM4	<i>No use of insecticide on arable crops and permanent crops</i>
CLIG3	<i>Manage grassland with very low nutrient inputs - outside SDAs or within SDAs</i>
CMOR1	<i>Assess moorland and produce a written record</i>
CMOR1A	<i>Assess moorland and produce a written record</i>
CNUM1	<i>Assess nutrient management and produce a review report</i>
CNUM2	<i>Legumes on improved grassland</i>
CNUM3	<i>Legume fallow</i>
CSAM1	<i>Assess soil, test soil organic matter and produce a soil management plan</i>
CSAM1A	<i>Assess soil, test soil organic matter and produce a soil management plan</i>
CSAM2	<i>Multi-species winter cover crops</i>
CSAM3	<i>Herbal leys</i>
CSP6	<i>Supplement: Cattle grazing (non-moorland)</i>
CT1	<i>Management of coastal sand dunes and vegetated shingle</i>
CT2	<i>Creation of coastal sand dunes and vegetated shingle on arable land improved grassland</i>
CT3	<i>Management of coastal saltmarsh</i>
CT4	<i>Creation of inter-tidal and saline habitat on arable land</i>
CT5	<i>Creation of inter-tidal and saline habitat by non-intervention</i>
CT6	<i>Coastal vegetation management supplement</i>
CT7	<i>Creation of inter-tidal and saline habitat on intensive grassland</i>
CUP10	<i>Limited livestock grazing on moorland</i>
CUP2	<i>Management of rough grazing for birds</i>
CWD1	<i>Woodland creation maintenance</i>
CWD2	<i>Woodland improvement</i>
ED1	<i>Educational Access</i>
FG1	<i>Fencing</i>
FG2	<i>Sheep netting</i>
FG3	<i>Permanent electric fencing</i>
FG4	<i>Rabbit fencing supplement</i>
FG5	<i>Fencing supplement - difficult sites</i>
FG6	<i>Invisible fencing system</i>
FG7	<i>Anti-predator combination fencing for vulnerable ground-nesting birds.</i>
FG8	<i>Anti-predator temporary electric fencing</i>
FG9	<i>Woodland Fencing - Deer</i>

FG10	<i>Temporary deer fencing / m</i>
FG11	<i>Deer exclosure plot/unit</i>
FG12	<i>Wooden Field Gate</i>
FG13	<i>Stone Gate Post</i>
FG14	<i>Badger Gates</i>
FG15	<i>Water Gates</i>
FG16	<i>Deer Pedestrian Gate</i>
FG17	<i>Deer Vehicle Gate</i>
FM1	<i>Management of geodiversity features</i>
FM2	<i>Major preparatory work for Priority Habitats (creation and restoration) and Priority Species</i>
FW1A	<i>On Farm Woodland</i>
FW1B	<i>Woodland Condition Assessment</i>
FW1C	<i>Woodland Threat Awareness</i>
FW1D	<i>Maintenance of New Tree Planting</i>
FY1	<i>Deer high seat / unit</i>
FY2	<i>Capital investments to improve access infrastructure to woodlands.</i>
FY2A	<i>Capital investments to improve access infrastructure to woodlands.</i>
FY3	<i>Squirrel Traps and Maintenance</i>
GRH6	<i>Manage priority habitat species-rich grassland</i>
GRH6	<i>Manage priority habitat species-rich grassland</i>
GRH7	<i>Supplement: Haymaking</i>
GRH8	<i>Supplement: Haymaking (late cut)</i>
GRH1	<i>Manage rough grazing for birds</i>
GRH10	<i>Supplement: Lenient grazing</i>
GRH11	<i>Supplement: Cattle grazing (non-moorland)</i>
GS1	<i>Take field corners and small areas out of management</i>
GS1	<i>Take field corners out of management</i>
GS1A	<i>Improved Grassland Soils</i>
GS2	<i>Permanent grassland with very low inputs (outside SDAs)</i>
GS2A	<i>Improved Grassland Soils</i>
GS3	<i>Ryegrass seed-set as winter food for birds</i>
GS3A	<i>Improved Grassland Soils</i>
GS3B	<i>Additional Payment</i>
GS3C	<i>Additional Payment</i>
GS4	<i>Legume and herb-rich swards</i>
GS5	<i>Permanent grassland with very low inputs in SDA</i>
GS6	<i>Management of species-rich grassland</i>
GS7	<i>Restoration towards species-rich grassland</i>
GS8	<i>Creation of species-rich grassland</i>
GS9	<i>Management of wet grassland for breeding waders</i>
GS10	<i>Management of wet grassland for wintering waders and wildfowl</i>
GS11	<i>Creation of wet grassland for breeding waders</i>
GS12	<i>Creation of wet grassland for wintering waders and wildfowl</i>
GS13	<i>Management of grassland for target features</i>
GS14	<i>Creation of grassland for target features</i>

GS15	<i>Haymaking supplement</i>
GS16	<i>Rush infestation control supplement</i>
GS17	<i>Lenient Grazing Supplement</i>
HE1	<i>Historic and archaeological feature protection.</i>
HE2	<i>Historic building restoration</i>
HE3	<i>Removal of eyesore</i>
HEF1	<i>Maintain weatherproof traditional farm or forestry buildings</i>
HEF2	<i>Maintain weatherproof traditional farm or forestry buildings in remote areas</i>
HEF5	<i>Control scrub on historic and archaeological features</i>
HEF6	<i>Manage historic and archaeological features on grassland</i>
HEF8	<i>Maintain designed or engineered waterbodies</i>
HRW1	<i>Assess and record hedgerow condition</i>
HRW2	<i>Manage hedgerows</i>
HRW3	<i>Maintain existing hedgerow trees, or establish new hedgerow trees</i>
HS1	<i>Maintenance of Weatherproof Traditional Farm Buildings</i>
HS1A	<i>Hedgerow</i>
HS2	<i>Take historic and archaeological features currently on cultivated land out of cultivation.</i>
HS2A	<i>Hedgerow</i>
HS3	<i>Reduced depth, non-inversion cultivation on historic and archaeological features</i>
HS3A	<i>Hedgerow</i>
HS4	<i>Scrub control on historic and archaeological features</i>
HS5	<i>Management of historic and archaeological features on grassland</i>
HS6	<i>Maintenance of designed/engineered water-bodies</i>
HS7	<i>Management of historic water meadows through traditional irrigation</i>
HS8	<i>Maintenance of Weatherproof Traditional Farm Buildings in Remote Areas</i>
HS9	<i>Restricted depth crop establishment to protect archaeology under and arable rotation</i>
IG1A	<i>Improved Grassland</i>
IG1B	<i>Additional Payment</i>
IG2A	<i>Improved Grassland</i>
IG2B	<i>Additional Payment</i>
IG3A	<i>Improved Grassland</i>
IG3B	<i>Additional Payment</i>
IGL1	<i>Take grassland field corners or blocks out of management</i>
IGL2	<i>Winter bird food on improved grassland</i>
IGL3	<i>4m to 12m grass buffer strip on improved grassland</i>
IPM1	<i>Assess integrated pest management and produce a plan</i>
IPM2	<i>Flower-rich grass margins, blocks, or in-field strips</i>
IPM3	<i>Companion crop on arable and horticultural land</i>
IPM4	<i>No use of insecticide, nematicide or acaricide on arable crops and permanent crops</i>
LH1	<i>Management of lowland heathland</i>
LH2	<i>Restoration of forestry and woodland to lowland heathland</i>
LH3	<i>Creation of heathland from arable or improved grassland</i>

LIG1	<i>Manage grassland with very low nutrient inputs (outside SDAs)</i>
LIG2	<i>Manage grassland with very low nutrient inputs (SDAs)</i>
LV1	<i>Cattle Grid</i>
LV2	<i>Livestock handling facilities</i>
LV3	<i>Hard bases for livestock drinkers</i>
LV4	<i>Hard bases for livestock feeders</i>
LV5	<i>Pasture pumps and associated pipework/unit</i>
LV6	<i>Ram pumps and pipework/unit</i>
LV7	<i>Livestock troughs</i>
LV8	<i>Pipework for livestock troughs</i>
MOR1	<i>Assess moorland and produce a written record</i>
MOR1A	<i>Assess moorland and produce a written record</i>
MPA1	<i>SFI Management Payment</i>
MPAY1	<i>SFI Management Payment</i>
NUM1	<i>Assess nutrient management and produce a review report</i>
NUM2	<i>Legumes on improved grassland</i>
NUM3	<i>Legume fallow</i>
OFA1	<i>Overwinter stubble (organic land)</i>
OFA3	<i>Supplementary winter bird food (organic land)</i>
OFA6	<i>Undersown cereals (organic land)</i>
OFC1	<i>Organic conversion - improved permanent grassland</i>
OFC2	<i>Organic conversion - unimproved permanent grassland</i>
OFC3	<i>Organic conversion - rotational land</i>
OFC4	<i>Organic conversion - horticultural land</i>
OFC5	<i>Organic conversion - top fruit</i>
OFM1	<i>Organic land management - improved permanent grassland</i>
OFM2	<i>Organic land management - unimproved permanent grassland</i>
OFM3	<i>Organic land management - enclosed rough grazing</i>
OFM4	<i>Organic land management - rotational land</i>
OFM5	<i>Organic land management - horticultural land</i>
OFM6	<i>Organic land management - top fruit</i>
OP1	<i>Overwintered stubble</i>
OP2	<i>Wild bird seed mixture</i>
OP3	<i>Supplementary feeding for farmland birds</i>
OP4	<i>Multi species ley</i>
OP5	<i>Undersown cereal</i>
OR1	<i>Organic conversion - improved permanent grassland</i>
OR2	<i>Organic conversion - unimproved permanent grassland</i>
OR3	<i>Organic conversion - rotational land</i>
OR4	<i>Organic Conversion - Horticulture</i>
OR5	<i>Organic Conversion - Top Fruit</i>
OT1	<i>Organic land management - improved permanent grassland</i>
OT2	<i>Organic Land Management - unimproved permanent grassland</i>
OT3	<i>Organic Land Management - rotational land</i>
OT4	<i>Organic Land Management - Horticulture</i>

OT5	<i>Organic Land Management - Top Fruit</i>
OT6	<i>Organic Land Management - Enclosed Rough Grazing</i>
PA1	<i>Implementation Plan/Unit</i>
PA2	<i>Feasibility Study</i>
PA3	<i>Woodland Management plan/per ha</i>
PA4	<i>Agro-forestry Plan</i>
PA5	<i>Moorland Mapping</i>
PA7	<i>Species Management Plan</i>
PRF1	<i>Variable rate application of nutrients</i>
PRF2	<i>Camera or remote sensor guided herbicide spraying</i>
PRF3	<i>Non-mechanical robotic weeding</i>
PRF4	<i>Mechanical robotic weeding</i>
RP1	<i>Resurfacing of gateways</i>
RP2	<i>Gateway relocation</i>
RP3	<i>Watercourse crossing/unit</i>
RP4	<i>Livestock and machinery hardcore tracks</i>
RP5	<i>Cross drains/unit</i>
RP6	<i>Installation of piped culverts and ditches</i>
RP7	<i>Sediment ponds and traps/sq. m</i>
RP8	<i>Constructed wetlands for the treatment of pollution</i>
RP9	<i>Earth banks and soil bunds/unit</i>
RP10	<i>Silt filtration dams or seepage barriers</i>
RP11	<i>Swales</i>
RP12	<i>Check dams and woody debris dams</i>
RP13	<i>Yard - underground drainage pipework</i>
RP14	<i>Yard inspection pit</i>
RP15	<i>Concrete yard renewal</i>
RP16	<i>Rainwater goods</i>
RP17	<i>Storage tanks underground</i>
RP18	<i>Above ground tanks</i>
RP19	<i>First-flush rainwater diverters/downpipe filters</i>
RP20	<i>Relocation of sheep dips and pens</i>
RP21	<i>Relocation of sheep pens only</i>
RP22	<i>Sheep dip drainage aprons and sumps</i>
RP23	<i>Installation of livestock drinking troughs (in draining pens for freshly dipped sheep)</i>
RP24	<i>Lined biobed plus pesticide loading and washdown area</i>
RP25	<i>Lined biobed with existing washdown area</i>
RP26	<i>Biofilters</i>
RP27	<i>Sprayer or applicator load and washdown area/sq. m</i>
RP28	<i>Roofing (sprayer washdown area, manure storage area, ...)</i>
RP29	<i>Self-supporting covers for slurry stores/sq. m</i>
RP30	<i>Floating covers for slurry stores and lagoons</i>
RP31	<i>Equipment to disrupt tramlines in arable areas</i>
RP32	<i>Small Leaky Woody Dam</i>

RP33	<i>Large Leaky Woody Dam</i>
SAM1	<i>Assess soil, produce a soil management plan, and test soil organic matter</i>
SAM1A	<i>Assess soil, produce a soil management plan, and test soil organic matter</i>
SAM2	<i>Multi-species winter cover crops</i>
SAM3	<i>Establish and maintain Herbal leys</i>
SB1A	<i>Scrub Control and Felling Diseased Trees</i>
SB1B	<i>Scrub Control and Felling Diseased Trees</i>
SB1C	<i>Scrub Control and Felling Diseased Trees</i>
SB1D	<i>Scrub Control and Felling Diseased Trees</i>
SB1E	<i>Scrub Control and Felling Diseased Trees</i>
SB1F	<i>Scrub Control and Felling Diseased Trees</i>
SB2	<i>Scrub control - difficult sites</i>
SB3	<i>Tree removal</i>
SB4	<i>Chemical Bracken Control</i>
SB5	<i>Mechanical bracken control</i>
SB6A	<i>Rhododendron control</i>
SB6B	<i>Rhododendron control</i>
SB6C	<i>Rhododendron control</i>
SB7	<i>Plant Health Supplement</i>
SCR1	<i>Create scrub and open habitat mosaics</i>
SCR2	<i>Manage scrub and open habitat mosaics</i>
SI1A	<i>Low/no input Grassland</i>
SI2A	<i>Low/no input Grassland</i>
SI3A	<i>Low/no input Grassland</i>
SI3B	<i>Additional Payment</i>
SOH1	<i>No-till farming</i>
SOH2	<i>Multi-species spring-sown cover crop</i>
SOH3	<i>Multi-species summer-sown cover crop</i>
SOH4	<i>Manage maize crops to protect soil</i>
SOH4	<i>Winter cover following maize crops</i>
SP1	<i>Difficult sites supplement</i>
SP10	<i>Administration of group managed agreements supplement</i>
SP2	<i>Raised water level supplement</i>
SP3	<i>Bracken control supplement</i>
SP4	<i>Control of invasive plant species supplement</i>
SP5	<i>Shepherding supplement</i>
SP6	<i>Cattle grazing supplement</i>
SP7	<i>Introduction of cattle grazing on the Scilly Isles</i>
SP8	<i>Native breeds at risk supplement</i>
SP9	<i>Threatened species supplement</i>
SPM2	<i>Supplement: Keep native breeds on grazed habitats (50-80%)</i>
SPM3	<i>Supplement: Keep native breeds on grazed habitats supplement (more than 80%)</i>
SPM4	<i>Supplement: Keep native breeds on extensively managed habitats (50-80%)</i>

SPM5	<i>Supplement: Keep native breeds on extensively managed habitats (more than 80%)</i>
SS1A	<i>Arable & Horticultural Soils</i>
SS1B	<i>Additional Payment</i>
SS2A	<i>Arable & Horticultural Soils</i>
SS3A	<i>Arable & Horticultural Soils</i>
SS3B	<i>Additional Payment</i>
SS3C	<i>Additional Payment</i>
SW1	<i>4-6m buffer strip on cultivated land</i>
SW2	<i>4-6m buffer strip on intensive grassland</i>
SW3	<i>In-field grass strips</i>
SW4	<i>12-24m watercourse buffer strip on cultivated land</i>
SW5	<i>Enhanced management of maize crops</i>
SW6	<i>Winter cover crops</i>
SW7	<i>Arable reversion to grassland with low fertiliser inputs</i>
SW8	<i>Management of intensive grassland adjacent to a watercourse</i>
SW9	<i>Seasonal livestock removal on intensive grassland</i>
SW10	<i>Seasonal livestock removal on intensive grassland</i>
SW11	<i>Riparian management strip</i>
SW12	<i>Making space for water</i>
SW13	<i>Very low nitrogen inputs to groundwaters</i>
SW14	<i>Nil fertiliser supplement</i>
SW15	<i>Flood mitigation on arable reversion to grassland</i>
SW16	<i>Flood mitigation on permanent grassland</i>
SW17	<i>Raised water levels on cropped or arable on peat soils</i>
SW18	<i>Raised water levels on grassland on peat soils</i>
TE1	<i>Planting Standard Hedgerow Tree</i>
TE2	<i>Planting Standard Parkland Tree</i>
TE3	<i>Planting Fruit Trees</i>
TE4A	<i>Woodland Tree Planting - Biodiversity</i>
TE4B	<i>Woodland Tree Planting - Improving water quality or reducing flood risk</i>
TE4C	<i>Woodland Tree Planting - Restock after a tree health issue</i>
TE4D	<i>Woodland Tree Planting - Hedges and clumps</i>
TE5	<i>Woodland Tree Planting - Tree shelter Supplement</i>
TE6	<i>Tree guard (tube and mesh)</i>
TE7	<i>Tree guard (Wood post and rail)</i>
TE8	<i>Tree Guard (wood post and wire)</i>
TE9	<i>Parkland Tree Guard - welded steel</i>
TE10	<i>Coppicing Bank-side Trees</i>
TE11A	<i>Tree surgery</i>
TE11B	<i>Tree surgery</i>
TE12	<i>Stump Grinding</i>
TE13	<i>Creation of dead wood habitat on trees</i>
TE14	<i>Identification of orchard fruit tree varieties</i>
UP1	<i>Enclosed rough grazing</i>

UP2	<i>Management of rough grazing for birds</i>
UP3	<i>Management of Moorland</i>
UP4	<i>Management of moorland vegetation supplement</i>
UP5	<i>Moorland re-wetting supplement</i>
UP6	<i>Upland livestock exclusion supplement</i>
UPL1	<i>Moderate livestock grazing on moorland</i>
UPL2	<i>Low livestock grazing on moorland</i>
UPL3	<i>Limited livestock grazing on moorland</i>
UPL4	<i>Supplement: Keep cattle and ponies on moorland (minimum 30% GLU)</i>
UPL5	<i>Supplement: Keep cattle and ponies on moorland (minimum 70% GLU)</i>
UPL6	<i>Supplement: Keep cattle and ponies on moorland (100% GLU)</i>
UPL7	<i>Shepherding livestock on moorland (no required stock removal period)</i>
UPL8	<i>Shepherding livestock on moorland (remove stock for at least 4 months)</i>
UPL9	<i>Shepherding livestock on moorland (remove stock for at least 6 months)</i>
UPL10	<i>Shepherding livestock on moorland (remove stock for at least 8 months)</i>
WB1	<i>Small Wildlife Box</i>
WB1B	<i>Waterbody buffering</i>
WB1C	<i>In Field Buffer Strip</i>
WB2	<i>Medium Wildlife Box</i>
WB2B	<i>Waterbody buffering</i>
WB2C	<i>In Field Buffer Strip</i>
WB3	<i>Large Wildlife Box</i>
WB3B	<i>Waterbody buffering</i>
WB3C	<i>In Field Buffer Strip</i>
WBD1	<i>Manage ponds</i>
WBD2	<i>Manage ditches</i>
WBD3	<i>In-field grass strips</i>
WBD4	<i>Arable reversion to grassland with low fertiliser input</i>
WBD5	<i>Manage intensive grassland adjacent to a watercourse</i>
WBD6	<i>Remove livestock from intensive grassland during the autumn and winter (outside SDAs)</i>
WBD7	<i>Remove livestock from grassland during the autumn and winter (SDAs)</i>
WBD8	<i>Manage grassland to reduce nutrient levels in groundwater</i>
WBD9	<i>Supplement: Nil fertiliser</i>
WD1	<i>Woodland creation - maintenance payments</i>
WD2	<i>Woodland improvement</i>
WD3	<i>Woodland edges on arable land</i>
WD4	<i>Management of wood pasture and parkland</i>
WD5	<i>Restoration of wood pasture and parkland</i>
WD6	<i>Creation of wood pasture</i>
WD7	<i>Management of successional areas and scrub</i>
WD8	<i>Creation of successional areas and scrub</i>
WD9	<i>Livestock exclusion supplement - scrub and successional areas</i>
WD10	<i>Management of upland wood pasture and parkland</i>
WD11	<i>Restoration of upland wood pasture and parkland</i>

WD12	<i>Creation of upland wood pasture</i>
WN1	<i>Blocking Grips or Drainage Channels</i>
WN2	<i>Creation of scrapes and gutters</i>
WN3	<i>Ditch, Dyke and Rhine Restoration</i>
WN4	<i>Ditch, Dyke and Rhine Creation</i>
WN5A	<i>Pond Management - creation (first 100 sq. m)</i>
WN5B	<i>Pond Management - restoration - first 100 sq. m</i>
WN6A	<i>Pond Management - creation - (areas more than 100 sq. m)</i>
WN6B	<i>Pond Management - restoration - (areas more than 100 sq. m)</i>
WN7	<i>Restoration of large water bodies</i>
WN8	<i>Timber sluice/unit</i>
WN9	<i>Brick, Stone, or Concrete Sluice</i>
WN10	<i>Construction of water penning structures</i>
WS1	<i>Deer Control and Management</i>
WS2	<i>Restore and maintain plantations on ancient woodlands sites</i>
WS3	<i>Squirrel control and management</i>
WS4	<i>Enable permissive access (by foot) across the whole woodland</i>
WT1	<i>Buffering in field ponds and ditches in improved grassland</i>
WT2	<i>Buffering in-field ponds and ditches on arable land</i>
WT3	<i>Management of ditches of high environmental value</i>
WT4	<i>Management of ponds of High Wildlife value (100 sq. m or less)</i>
WT5	<i>Management of ponds of High Wildlife value (more than 100 sq. m)</i>
WT6	<i>Management of reedbed</i>
WT7	<i>Creation of reedbed</i>
WT8	<i>Management of fen</i>
WT9	<i>Creation of fen</i>
WT10	<i>Management of lowland raised bog</i>
WT11	<i>Wetland cutting supplement</i>
WT12	<i>Wetland grazing supplement</i>

5 Version Control

Version	Date	Author	Reason for Issue
0.1	24/07/2025	P. Dutton	Initial draft for consultation
